Ethernet
# E-Access & E-Line

Nationwide, high-speed bandwidth for increased performance.

Secure, reliable, affordable connectivity.

Windstream Wholesale's nationwide Ethernet footprint offers the high-speed bandwidths you need to support essential voice, video and data applications.

Our Ethernet services provide customers with **secure, trustworthy connectivity via E-Access and E-Line Point-to-Point and Point-to-Multipoint network solutions -** each designed to increase performance while expanding your market share and boosting your competitive advantage.

E-Access: UNI to ENNI

Reach your customers while avoiding the costly expense of building your own network. Windstream Wholesale's MEF 2.0 Certified E-Access service provides a single point of access into our nationwide markets to expand your coverage.

E-Line: UNI to UNI

Select a simple, cost-effective design to connect your customers with Windstream Wholesale's E-Line. Our E-Line services use fiber optic technology to connect your traffic with a highly secure and protected core Ethernet network. Our focus is to increase operational efficiency when configuring, operating, and managing your traffic.

E-Access advantages

- ✓ 1Gbps and 10Gbps ENNI ports
- ✓ 44 pre-established regional peering points
- ✓ Scalable bandwidths ranging from 3Mbps to 1Gbps
- ✓ Customer-controlled packet routing
- ✓ Guaranteed performance SLA of 99.99%
- ✓ COS - Real Time, Mission Critical, and Standard

E-Line advantages

- ✓ Connects to Cloud effortlessly and securely
- ✓ Flexible and scalable choice of bandwidths ranging from 3Mbps to 1Gbps
- ✓ Replace and Modernize TDM Private Networks
- ✓ COS - Real Time, Mission Critical, and Standard
- ✓ Highly efficient for delivering high-bandwidths to data applications
